

# Diabetes Project

Let's see my project

WHAT IS THIS  
PROJECT?

This project is about

That there is diabetes  
dataset and my goal is to  
see what factors affect on  
diabetes existence

## Tools I have used

1: Visual studio code

2: Python language

3: jupyter notebook

4: pandas library

2: Numpy library

3: Matplotlib library

## Analysis steps

1

Gathering Data

3

Cleaning Data

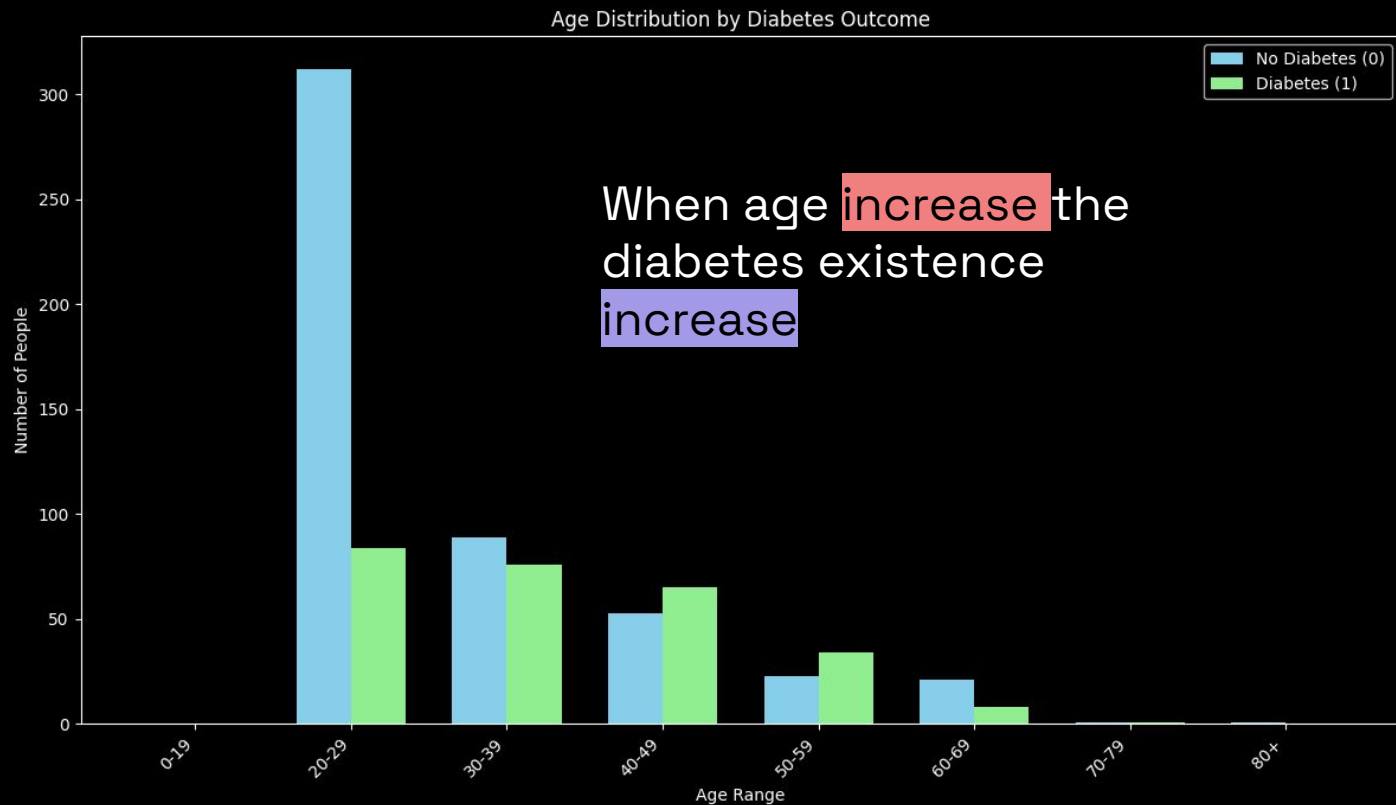

2

Investigating Data

4

Visualizing Data

## First insight:

## Second insight:

conclusion:

1 You should follow your insulin level

2 Follow a good diet to ensure that your age won't affect on diabetes existence

Thanks for your time
